FIELD LEVEL NOTES

Section Number: Main

Field Name: FedAllocExpended Row Name: Federal Allocation Column Name: Expended

Year: 2005 Field Note:

As reported previously, the budget period has been transitioned from a federal fiscal year to a calendar fiscal year. Consequently, the annual reporting of budgeted. encumbered, and expended monies through September 30th is misleading in that we actually have another three months remaining in our calendar year budget cycle so expenditures will appear less than they should while remaining money will appear greater.

Section Number: Main

Field Name: StateMCHFundsExpended

Row Name: State Funds Column Name: Expended

Field Note:

Arizona state funds (match and overmatch) are \$12,377,326, surpassing our state's maintenance of effort level in FY1989, \$12,056,360. However, it is less than budgeted because of state funding cuts due to a slumping state economy.

Section Number: Main

Field Name: OtherFundsExpended Row Name: Other Funds Column Name: Expended

Year: 2005 Field Note:

The other funding support for 2005, in the amount of \$19,573,750, came from our collaboration with other state government agencies that supplemented the CRS, Health Start, and Teen Pregnancy Prevention programs. The increase in FY2005 is the result of time limited Lottery funds.

Section Number: Main

Field Name: OtherFundsExpended Row Name: Other Funds Column Name: Expended

Year: 2004 Field Note:

The other funding support for 2004, in the amount of \$17,728,718, came from our collaboration with other state government agencies that supplemented CRS, Health Start and Teen Pregnancy Prevention programs. The increase in FY2004 is the result of time limited tobacco settlement funds.

FIELD LEVEL NOTES

1. Section Number: Other Screening Types

Field Name: Other Row Name: All Rows Column Name: All Columns

Year: 2007 Field Note:

The number of newborn screens reported is an undercount. Arizona's Newborn Screening Data system is not able to identify a unique child count. So, what is reported is the number of "first screens" reported in our system. The count of first screens is an undercount for two reasons. One reason for the undercount is that if a child is five days or older when screened for the first time, the specimen is often labeled as a "second screen" to facilitation accurate reporting of results. Additionally, until mid year 2006, unsatisfactory specimens were not counted as first or second screens, but rather as a specimen type. When children with unsatisfactory screens were re-screened to get a satisfactory screen, the specimen was labeled as a second screen and second screens are not included in the count provided on Form 6.

Section Number: I. Unduplicated Count By Race

Field Name: DeliveriesTotal_Asian Row Name: Total Deliveries in State

Column Name: Asian

Year: 2007

Field Note:
Vital Records includes "Other Asian and Pacific Islander", which are added to the Asian category.

Section Number: I. Unduplicated Count By Race Field Name: DeliveriesTitleV_All Row Name: Title V Served Column Name: Total All Races

Year: 2007 Field Note:

Total all races is the number or babies receiving newborn screening. Race and ethnicity are not captured by the Newborn Screening Program; however, a very high percentage of all births receives newborn screening. Therefore, the number of deliveries receiving Title V services within each racial and ethnic category is estimated to be the total number of Title V served times the percent of all deliveries in the state represented by that racial group.

FORM 10 TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT STATE PROFILE FOR FY 2007 [SEC. 506(A)(1)] STATE: AZ

1. State MCH Administration:

(max 2500 characters)

The Arizona Department of Health Services was established as the State Public Health Agency in 1973 under A.R.S. Title 36 and is designated as Arizona's Title V Agency. The Bureau of Public Health Prevention Services (formerly known as the Bureau of Community and Family Health Services), in which the Office of Women's and Children's Health and the Office for Children with Special Health Care Needs are located, provides policies and standards development, comprehensive planning, community organization and development, training and technical assistance, and direct provision of screening, preventive and curative services. Services provided through the Title V program include, but are not limited to, the statewide Newborn Screening, Universal Newborn Hearing Screening, High Risk Perinatal Services, Children's Rehabilitative Services, community development, Community Grants Initiative, Family Planning, Hotline, Health Start, Medical Home Project, and Traumatic Brain Injury Project.

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

(max 2500 characters)

OCSHCN provides MCH block grant dollars to fund service coordination for children who are at risk of developmental delays but do not meet the medical or financial eligibility requirements of the AzEIP. Additional block grant dollars, in conjunction with funding from the Governor's Council on Head and Spinal Injuries, and a grant from BHHS Legacy Foundation provide service coordination to children and youth with traumatic brain and spinal cord injuries up to the age of 21. The Community Development Initiative, led by OCSHCN, builds on 10 years of work with parent leaders and community development at the local level. Through endorsement by the Governor's Office, several state agencies will be incorporating youth and families into their decision-making processes. OCSHCN parent leaders will provide leadership in: training parents, serving and members to new agencies and families as they implement a process to identify parents, involving families in the development of policies and procedures, and evaluate the effectiveness of this integration OCSHCN will be working closely with the community development consultant as all of these activities are implemented. Most of the parent leaders and the organizational support contracts for the community teams are funded by Title V dollars.

b. Population-Based Services:

(max 2500 characters)

Teen Pregnancy Prevention Health Marketing Campaign: State funds became available in 2004 to address prevention of teen pregnancies in Arizona. Key stakeholders were brought together to help determine the best use for the funds, and a major outcome was a statewide teen pregnancy prevention marketing campaign. The campaign used a poetry jam format in television ads to promote a message of "Respect yourself: abstain or use a condom." The campaign is complemented by the funding of two community-based projects in locations with the highest teen pregnancy rates. The community-based projects will create a local plan to address teen pregnancy, and then begin implementation of the plan. Newborn Screening: In 2005, the Arizona Legislature enacted legislation requiring the ADHS to specify in rule the disorders to be screened and added the follow up of newborn hearing disorders. This legislature allows for the expansion of the number and type of disorders screened in newborns. Tandem Mass Spectrometry has been added to the methodologies used for newborn screening in Arizona, which vastly increases the number of possible disorders that can be screened. ADHS identifies over a hundred newborns annually through screening, who are ultimately diagnosed with clinically significant disorders. In 2004, the Newborn Screening Program located all of the affected infants and facilitated access to care until assured that the newborns received appropriate need services. Children with special Health Care Needs: OCSHCN provides Title V financial support to the Asthma Coalition by funding the executive director position and the development of an annual report with recommendations to the community on how to prevent and treat asthma. OCSHCN funds the Pinal County Division of Public Health to work with school nurses to implement asthma action plans. Phoenix Children's Hospital receives funding from OCSHCN to developing a model community action plan for some Head Start Programs in Maricopa County.

c. Infrastructure Building Services:

(max 2500 characters,

Women's Health: OWCH used Title V funds to support the women's health policy advisor to the Governor. The policy advisor, located in the Governor's Office for Children, Youth, and Families, works closely with OWH on issues such as family planning, teen pregnancy prevention, and preventive health care for women. Major initiatives include development and implementation of activities for Women's Health Week and staffing the Governor's Commission on the Health Status of Women. State Early Childhood Comprehensive Systems Grant: OWCH has collaborated with the Governor's School Readiness Board to apply for and carry out the activities of the State Early Childhood Comprehensive Systems Grant. The statewide early childhood systems planning initiative is coordinated by the Governor's Office for Children, Youth and Families' School

Readiness Board staff. The School Readiness Board submitted recommendations to the Governor, and the Governor's School Readiness Action Plan was developed. School Readiness Board staff and OWCH staff are working together to implement the health-related recommendations from the Governor's Action Plan. Initiatives include expansion of health screenings for young children and the development of a statewide child care health consultation system. Injury Prevention: OWCH leads the Department's injury prevention efforts through management of the ADHS Injury Prevention Advisory Council and the ADHS Injury Prevention Internal Workgroup. Infrastructure-building activities include leading the update to the statewide injury surveillance and prevention plan, and outreach to new and existing partners throughout the state. In addition, significant Title V resources are dedicated to child car seat safety. Community-based projects funded by Title V typically include training additional people to become certified by the national Highway Safety Transportation Administration for teaching parents/caregivers how to properly install car seats. The OWCH also houses the Arizona Safe Kids coalition, which Title V dollars to match these grant dollars in the implementation of medical homes in two physician practices and two school-based clinics, as well as evaluate the use of screening tools.

Field Level Notes

1. Section Number: Performance Measure #7

Field Name: PM07 Row Name: Column Name: Year: 2005 Field Note:

The source of immunization data is the CDC National Immunization Survey (http://www.cdc.gov/nip/coverage/NIS/01/toc-01.htm). Previously, the reported rate represented the coverage level for 4DPT, 3OPV and 1 MMR only, because data were not reliably available for the full series recommended by the CDC, which also includes 3 doses of Hep B and 3 doses of Hib. No data were available for this measure for 1998, but the data points for 1999 forward have been changed to reflect the full 4:3:1:3:3 series. Performance objectives were also changed to reflect the change in the measure. Estimates for data points are based on reports for the following date ranges:

1999 = July 1998 through Jun 1999

2000 = "2000"

2001 = Jan 01 through Dec 01

2002 = Jul 01 through Jun 02

2003 = Jul 02 through Jun 03

2004= Jul 03 through Jun 04

2005= Jan 04 through Dec 04

The 2005 estimate reflects the immunization status of children by age two for children who were 19-35 months of age, born between February 2001 and May 2003. The estimate tolerates 4.2% error at a 95% confidence level.

2. Section Number: Performance Measure #7

Field Name: PM07 Row Name: Column Name: Year: 2004 Field Note:

The source of immunization data is the CDC National Immunization Survey (http://www.cdc.gov/nip/coverage/NIS/01/toc-01.htm). Previously, the reported rate represented the coverage level for 4DPT, 3OPV and 1 MMR only, because data were not reliably available for the full series recommended by the CDC, which also includes 3 doses of Hep B and 3 doses of Hib. No data were available for this measure for 1998, but the data points for 1999 forward have been changed to reflect the full 4:3:1:3:3 series. Performance objectives were also changed to reflect the change in the measure. Estimates for data points are based on reports for the following date ranges:

1999 = July 1998 through Jun 1999

2000 = "2000"

2001 = Jan 01 through Dec 01

2002 = Jul 01 through Jun 02

2003 = Jul 02 through Jun 03.

2004= Jul 03 through Jun 04

The 2004 estimate reflects the immunization status of children by age two for children who were 19-35 months of age, born between August 2000 and November 2002. The estimate tolerates 3.8% error at a 95% confidence level.

Field Level Notes

1. Section Number: Performance Measure #9

Field Name: PM09 Row Name: Column Name: Year: 2005 Field Note:

The figure for 2005 is from a statewide oral health survey of over 80 communities, for 1999-2003. This survey will be re-done for each needs assessment year, with the next survey scheduled for 2010.

2. Section Number: Performance Measure #9

Field Name: PM09 Row Name: Column Name: Year: 2004 Field Note:

The data source for this measure has been changed. Figures for previous years were from a statewide oral health survey of over 80 communities. The measure for 2004 is based on children in schools from five of the 15 counties in Arizona where at least 65% of the student population in the school are on the Free and Reduced Lunch program. Data is collected on second grade children because physiologically, their average age is the optimum time for sealant placement on first permanent molars. Presence of existing dental sealants is determined at the time of the screening for sealant need, and before any additional sealants are placed. Data reported for 2004 were collected during the 2003-2004 school year and 24% of students were found to have sealants. The same surveillance method on the previous academic year yielded an estimate of

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

1. Section Number: State Performance Measure #1

Field Name: SM1 Row Name: Column Name: Year: 2005 Field Note:

Data for 2005 are not yet available. The estimate for 2005 is provisionally set at the 2004 rate until data become available in the Fall of 2006.

2. Section Number: State Performance Measure #1

Field Name: SM1 Row Name: Column Name: Year: 2004 Field Note:

Both the numerator and the denominator for this measure changed as of the 2004 reporting year. In the past, Arizona reported just those women receiving family planning services through Title V funded clinics in the numerator. The denominator, was women below 150% FPL.

Starting with the 2004 data point, the numerator is women at or below 200% FPL who received family planning services through Title V, TItle X, Title XIX, or 330/340 Federally Funded Community Health Centers. The denominator is women at or below 200% FPL who are fertile.

STATE PERFORMANCE MEASURE # 2

FIELD LEVEL NOTES

FORM 14 LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: AZ FY: 2007

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

- 1. Reduce teen pregnancy and increase women's access to reproductive health services
- 2. Reduce obesity and overweight among women and children
- 3. Reduce preventable infant mortality
- 4. Reduce the rate of injuries, both intentional and unintentional
- 5. Increase access to prenatal care among the underserved
- 6. Improve oral health of children, especially among high-risk populations
- 7. Integrate mental health with general health care
- 8. Increase the accessibility and availability of individualized health and wellness resources for children and youth with special health care needs
- 9. Increase the availability of a cohesive and stable continuum of resources within a medical home that includes an improved quality of life approach
- 10. Increase the recognition of families as integral partners in the care of their children's health and wellbeing

FORM NOTES FOR FORM 15

None

FIELD LEVEL NOTES

FORM 16 STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET STATE: AZ

CI	> #	- 1
ΟГ	- #	

PERFORMANCE MEASURE: Proportion of low-income women who receive reproductive health/family planning services.

STATUS:

GOAL To improve the health status of women of childbearing age (15-44 years).

DEFINITION

Numerator:

Number of women of low economic status (at or below 200% of federal poverty line) age 15-44 who receive reproductive

health and family planning services.

Denominator:

Number of women of low economic status (at or below 200% of federal poverty line) age 15-44.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Increase to at least 70% the proportion of all pregnancies among women 15-44 that are planned.

In an effort to provide a timely and reasonable estimate of the need for family planning services in Arizona, the Arizona **DATA SOURCES AND DATA ISSUES**

Family Planning Council conducts an annual needs assessment. The needs assessment compares the number of lowincome women who are potentially in need of family planning services (women 15 through 44 with an income at or below 200 percent federal poverty level who are fertile) to the number of these women reported to receive free or subsidized family planning services through publicly funded resources. Publicly funded service networks work collaboratively with Arizona Family Planning Council to provide data for this report.

SIGNIFICANCE Publicly funded family planning services are provided through Title V, Title X, AHCCCS, county governments, and

federally-funded community health centers. Services include birth control and other vital health care services to lowincome women and teens including breast and cervical cancer screening, screening and treatment for STDs, HIV and pregnancy testing and counseling, comprehensive physical exams and other primary health care services. Often, family planning clinics are the only source of primary care for women. The 2002 National Survey of Family Growth found that many pregnancies continué to be either mistimed or unwanted. Three fourths of women 25 through 44 years of age intended their pregnancy, while less than one fourth (22 percent) of women under the age of 20 indicated that their pregnancy was intended. For those women under the age of 20, 57 percent said that the pregnancy was mistimed and 22

percent said that it was unwanted.

SP# 2

PERFORMANCE MEASURE: The percent of high school students who are overweight or at-risk for overweight.

STATUS: Act

GOAL Reduce the percent of high school students who are overweight or at-risk for overweight.

DEFINITION Youth Risk Behavior Survey calculates body mass index from students' self reports of heights and weights, and categorizes

them using CDC criteria as normal, underweight, overweight, and at-risk for becoming overweight.

Numerator:

The weighted number of students classified as either "overweight" or "at-risk for overweight" in the YRBS.

Denominator:

The weighted number of all students in the Youth Risk Behavior Survey.

Units: 100 Text: 1

HEALTHY PEOPLE 2010 OBJECTIVE

19-3

Reduce the proportion of children and adolescents who are overweight or obese.

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey calculates body mass index from students' self reports of heights and weights, and categorizes

them using CDC criteria as normal, underweight, overweight, and at-risk for becoming overweight.

SIGNIFICANCE

The National Health and Nutrition Examination Survey found that there has been an increase in overweight 12-19 year-olds from 5% to 16% over the last 40 years. While maintaining a healthy weight is important for people of all ages, being overweight during childhood can carry life-long health consequences. The Surgeon General's Call to Action to Prevent and Decrease Overweight and Obesity states: "Risk factors for heart disease, such as high cholesterol and high blood pressure, occur with increased frequency in overweight children and adolescents compared to children with a healthy weight. Type 2 diabetes, previously considered an adult disease, has increased dramatically in children and adolescents. Overweight and obesity are closely linked to type 2 diabetes. Overweight adolescents have a 70% chance of becoming overweight or obese

adults."

SP# 3

PERFORMANCE MEASURE: The percent of preventable fetal and infant deaths out of all fetal and infant deaths.

STATUS:

GOAL Reduce infant mortality by reducing the percent of preventable fetal and infant deaths.

Using the CDC Periods of Risk Model, excess deaths will be identified by comparing death rates of various subgroups to **DEFINITION**

infant death rates of White women age 20 and older with more than 12 years of education.

Numerator:

Total number of excess deaths identified by the Periods of Risk analysis.

Denominator:

Total number of fetal and infant deaths.

Units: 100 Text: 1

16-1 **HEALTHY PEOPLE 2010 OBJECTIVE**

Reduce the fetal(fetal deaths at 20 or more weeks of gestation) to no more than 4.1 per 1,000 live births, and reduce the

infant mortality rate to no more than 5 per 1,000 live births.

Arizona infant and fetal death certificates will be matched to birth certificate data using the CDC Periods of Risk Model. Deaths will be classified into periods of risk by weight and gestational age at the time of death, and excess death rates will **DATA SOURCES AND DATA ISSUES**

be calculated by race/ethnicity, age, and education level.

Although infant mortality in Arizona has declined, disparities remain in the rates of death among various subgroups of the **SIGNIFICANCE**

population. African American, American Indian, and Hispanic infants die at higher rates than White infants, as do infants born to less educated women and teens. While not all infant mortality can be prevented, disparities suggest that

interventions directed at excess mortality within high-risk populations provide an opportunity for further progress.

SP # 4

PERFORMANCE MEASURE: Emergency department visits for unintentional injuries per 100,000 children age 1-14.

STATUS: Activ

GOAL

To reduce the rate of emergency department visits for unintentional injuries among children age 1-14.

DEFINITION

Numerator

The number of outpatient emergency department visits for non-fatal unintentional injuries and poisonings for children age 1-

14

Denominator

The population of children age 1-14.

Units: 100000 Text: Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Injury/violence Prevention Objective 9

Reduce emergency department visits caused by unintentional injuries to no more than 111 per 1,000 people.

DATA SOURCES AND DATA ISSUES

All acute-care hospitals in Arizona, with the exception of federal hospitals (military and Indian Health services), are required to submit emergency room utilization data to the Arizona Department of Health Services twice a year. The population of

to submit emergency room utilization data to the Arizona Department of Health Services twice a year. The population age 1-14 is based on the Arizona Department of Economic Security population projections.

SIGNIFICANCE

Injuries, both intentional and unintentional, are among the leading causes of death among children of all ages in Arizona. Unintentional injuries, homicides, and suicides accounted for 79% of all deaths among children 1-14 and 75% of deaths among adolescents age 15-19 in 2003. In addition, there were 6,874 inpatient hospitalizations for non-fatal injuries and

poisonings. Thousands more less severe injuries are seen in emergency rooms as outpatients.

SP # 5

PERFORMANCE MEASURE: The percent of women entering prenatal care during their first trimester in underserved primary care areas.

STATUS: Act

GOAL To increase the percent of women entering prenatal care during their first trimesters in underserved primary care areas.

DEFINITIONUnderserved primary care areas, for the purpose of this measure, are defined as areas in which fewer than 74 percent of

women received a prenatal visit within their first trimester in 2003.

Numerator:

The number of women in underserved primary care areas who received a prenatal visit during their first trimester of

pregnancy.

Denominator:

The number of women in underserved primary care areas who delivered a live birth.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 1

16-6

Increase the proportion of pregnant women who receive early and adequate prenatal care to 90%.

DATA SOURCES AND DATA ISSUES

Arizona birth certificate data contains information that allows it to be aggregate into primary care areas. Birth certificates will

be the source of both the numerator and denominator for this measure.

SIGNIFICANCE

Prenatal care is an opportunity to identify risks and mitigate their impact on pregnancy outcomes through medical management. Prenatal visits also offer an opportunity for education and counseling on proper nutrition and risk factors, such

as smoking and alcohol use during pregnancy. Prenatal care is more effective when women enter care early in their pregnancy. There are many areas of the state where the percent of women entering prenatal care early lags behind the

statewide average.

SP# 6

PERFORMANCE MEASURE: Percent of Medicaid enrollees age 1-18 who received at least one preventive dental service within the last year.

STATUS:

GOAL

To increase the percent of high-risk children who receive preventive dental services each year to 57%.

DEFINITION

Numerator:

Line 12B, "Total eligibles receiving preventive dental services," sum of columns "1-2," "3-5," "6-9," "10-14," "15-18."

Line 1, "Total individuals eligible for EPSDT," sum of columns "1-2," "3-5," "6-9," "10-14," "15-18."

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Increase the proportion of low-income children and adolescents who received any preventive dental service during the past

DATA SOURCES AND DATA ISSUES

AHCCCS produces an annual "Form HCFA-416: Annual EPSDT Participation Report for Funding Source: Title XIX"

containing dental utilization data, including information on preventive dental services.

SIGNIFICANCE

U. S. Surgeon General David Satcher deemed dental disease the "silent epidemic," yet, it is preventable with early intervention and the promotion of evidence-based prevention efforts like dental sealants. In an effort to improve health and well being it is imperative that we target interventions at preventing dental disease, especially in high-risk children. Although children enrolled in Medicaid are fully covered for dental services, they often fail to receive preventive dental care.

SP # 7

PERFORMANCE MEASURE: Percent of parents and youth participating with state agencies in community development initiatives who completed the

Parent Youth Leadership Training.

STATUS:

GOAL To have all parents and youth participating with state and community agencies to have completed the Parent Youth

Leadership Training.

DEFINITION

Numerator:

Number of parents and youth completing Parent Youth Leadership Training.

Denominator:

All parents and youth who are compensated for participation in OCSHCN activities.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16.23

Increase the proportion of states and jurisdictions that have service systems for children with or at risk for chronic and

disabling conditions as required by Public Law 101-239.

DATA SOURCES AND DATA ISSUES Eventually, the numerator will be obtained from the ADHS e-Learning Management System, which will record access to the

learning modules, completion of the modules, and the results of online competency testing. The denominator will be

obtained from contract agreements with parents and youth leaders.

SIGNIFICANCE

The Arizona Department of Health Services, Office for Children with Special Health care Needs sought public input from its partners (e.g., community health centers, foundations, county health departments, state and community agencies,

partners (e.g., community health centers, foundations, county health departments, state and community agencies, providers, and families of children with special health care needs) through a Needs Assessment Planning Group and focus groups composed of family members of children and youth with special health care needs. Participants in these groups were presented with data related to health status indicators, performance measures, and needs assessment. Education of youth, parents, and providers was mentioned as a significant need by both the focus groups and the Needs Assessment

Planning group.

HSI #10 - Demographics (Geographic Living Area) Geographic living area for all resident children aged 0 through 19 years old. (Demographics)

Reporting Year: 2005 Is this data from a State Projection? No Is this data final or provisional? Final

GEOGRAPHIC LIVING AREAS	TOTAL	
Living in metropolitan areas	1,580,305	
Living in urban areas	1,335,937	
Living in rural areas	337,721	
Living in frontier areas	118,884	
Total - all children 0 through 19	1,792,542	
		一

Note:

The Total will be determined by adding reported numbers for urban, rural and frontier areas.

FORM 21 HEALTH STATUS INDICATORS DEMOGRAPHIC DATA STATE: AZ

HSI #11 - Demographics (Poverty Levels) Percent of the State population at various levels of the federal poverty level. (Demographics)

POVERTY LEVELS	TOTAL	
Total Population	6,044,985.0	
Percent Below: 50% of poverty	6.6	
100% of poverty	14.1	
200% of poverty	33.5	

FORM 21 HEALTH STATUS INDICATORS DEMOGRAPHIC DATA STATE: AZ

HSI #12 - Demographics (Poverty Levels) Percent of the State population aged 0 through 19 at various levels of the federal poverty level. (Demographics)

Reporting Year: 2005 Is this data from a State Projection? No Is this data final or provisional? Final

POVERTY LEVELS	TOTAL	
Children 0 through 19 years old	1,689,074.0	
Percent Below: 50% of poverty	10.7	
100% of poverty	21.0	
200% of poverty	41.7	

FORM NOTES FOR FORM 21

Except where separate enumerations were available, "Asian" includes other Asians and Pacific Islanders.

HSI#07: 2005 birth data is now available, with race and ethnicity breakdowns. Data for 2004 is not provided, but is available upon request. Please note that there will be a gap in the data reported from the 2006 application (where 2003 data was provided) to the 2007 application (where 2005 data was provided), as the 2004 data is being skipped in order to provide the most recent data available. There was one woman of unknown age delivering in 2005, whom is excluded from this table. HSI#8: 2005 death data is now available, with race and ethnicity breakdowns. Data for 2004 is not provided, but is available upon request. Please note that there will be a gap in the data reported from the 2006 application (where 2003 data was provided) to the 2007 application (where 2005 data was provided), as the 2004 data is being skipped in order to provide the most recent data available.

-Percent in household headed by single parent data are from 2000 Census.

- The number of children in TANF families is unavailable. The number reported is the percent of children enrolled in TANF divided by the total number of all children.

- WIC enrollment by race/ethnicity is not available.

HSI#10: The proportions living in various geographic areas from the year 2000 Census were applied to the total DES population estimates for 2005 to estimate the numbers living in various geographic areas.

FIELD LEVEL NOTES

1. Section Number: Indicator 09A

Field Name: HSIRace_SingleParentPercent

Row Name: Percent in household headed by single parent

Column Name: Year: 2007 Field Note:

Percent in household headed by a single parent data are from the 2000 Census.

2. Section Number: Indicator 09A Field Name: HSIRace_WICNo Row Name: Number enrolled in WIC

Column Name: Year: 2007 Field Note:

Race and ethnicity is not available.

Section Number: Indicator 09B

Field Name: HSIEthnicity_SingleParentPercent

Row Name: Percent in household headed by single parent

Column Name: Year: 2007 Field Note:

Percent in household headed by a single parent data are from the 2000 Census.

Section Number: Indicator 09B
 Field Name: HSIEthnicity_WICNo
 Row Name: Number enrolled in WIC

Column Name: Year: 2007 Field Note:

Race and ethnicity is not available.
